7,000 Reasons to Reach this Country of over 7,000 islands

November 2024

Dear Pastor and Praying Friends:

The months of October and November are typhoon season here in the Philippines. We have been hit 6 times in these two months. We praise the Lord for His safety and protection. The last typhoon was a Category 5; yet as it came closer, it slowed to a category 3. This slowed the winds and rain, making it a less dangerous storm. The arrow above points to the furthest island in the Philippines. There are 15,000 people who live on the island of Batanes. This island is in the heart of typhoon alley. There is only one church on this island. We have a couple from our church that will be going to start a church there, Lord willing, in December of 2025. Ryan and Angel are currently raising support here in the Philippines as local missionaries. Please pray for this young couple. Angel is expecting their first child, and is experiencing complications due to an ovarian cyst.

A new ministry was started by our church men while we were in the States last year. Several of the men who own motorcycles got together to ride once a month. They started passing out tracts when they went. They ride further out than our normal visitation areas. If a church member gives them an address, this group will ride out and pass out tracts in the area while a soulwinner finds the address to go share the Gospel. They have gone as far as 3 hours away. As a result, siblings, friends, parents, even grandparents have been saved! Our pianist, Sis Kenneth, asked them to visit her family. They have a Jehovah Witness background, and she has tried for years to witness to her family. One Saturday, the 'motor-cade' rode out, and a soulwinner led her father, grandmother, and 3 other family members to the Lord. A month later, there was a death in the family, and the father and grandmother specifically requested that our church come and share the Gospel with the rest of the family. Several others received the Lord Jesus Christ as Saviour!
